EDITOR'S NOTE-BOOK

Wilson MacDonald, famous Canadian poet and well known to university and school audiences in the United States as well as Canada, contributes in this issue a new poem entitled "December". Readers will recall with pleasure Mr. MacDonald's stirring poem "The Song of the Ski", published in our January 1945 issue.

J. Lewis Robinson is well known to readers of the Journal for his comprehensive articles on Canada's Northland. After graduating from the University of Western Ontario and Syracuse University, Dr. Robinson did post-graduate work in geography at Clark University, where he lectured in cartography and meteorology. He was recalled by the Canadian Government in 1943 to take over geographical work for the Bureau of Northwest Territories and Yukon Affairs of the Department of Mines and Resources. Dr. Robinson is now Associate Professor in charge of geography courses in the Department of Geology and Geography at the University of British Columbia. He has spent many seasons on field work in the North and his present article on Canada's Western Arctic is based on field work carried out during the summer of

1947 when he was geographical observer with the joint Mines and Resources—R.C.A.F. North Magnetic Pole Survey.

Eric Hardy, an English naturalist and writer, served as a captain in the Royal Corps of Signals during the recent war, first with the Army Pigeon Service, and later in Palestine and the Middle East. In 1945 and 1946 he was Education Officer for Jerusalem East Zone. He founded and was honorary secretary of the Jerusalem Naturalists' Club, editing its bi-monthly bulletins and leading several expeditions collecting specimens for museums. He is now honorary editor of the English "Nature Lover Magazine".
